*Module specification
Version 1*

PRINCIPLES AND PRACTICE OF GREEN AND SUSTAINABLE FINANCE

LEVEL: Designed as SCQF Level 8/EQF Level 5

CREDITS: Designed as 13

QUALIFICATIONS TO WHICH MODULE CONTRIBUTES:

- Certificate in Green and Sustainable Finance
- Diploma in Green and Sustainable Finance
- Professional Banker Diploma

AUDIENCE:

All financial services professionals globally who wish to develop and demonstrate their knowledge and expertise of Green and Sustainable Finance. Broad financial services sector coverage, including bankers, insurers, investment managers, central bankers and regulators, risk managers, analysts and consultants. No prior knowledge of the green and sustainable finance sector is required.

AIM:

To develop the learner's knowledge, understanding and skills relating to green and sustainable finance by providing an overview of, and introduction to, the underpinning science, principles and practice of the field. Specific aims are to increase the learner's knowledge and understanding of the range of green and sustainable products and services in the banking, investment and insurance sectors, and increase awareness of the role of the finance sector and finance professionals in supporting the transition to a low-carbon world.

LEARNING OUTCOMES:

On completion of this module, the learner will be able to:

1. explain what is meant by 'green' and 'sustainable' finance, the key factors that underpin the science of climate change, and the ways in which the finance sector can support the transition to a sustainable, low-carbon economy
2. explain the role of a range of key players and policy and regulatory frameworks in building and supporting a sustainable financial system, and the importance of monitoring, measuring and reporting the flow of investment to support the transition to a sustainable, low-carbon world
3. examine the nature and importance of key climate-related and environmental risks, the role of financial services in the financial system, and how different types of financial services activity, products and services can improve the quality and functioning of the natural environment and natural systems
4. describe the role of retail, commercial, and wholesale banking, and the role of central and development banks, in supporting the development of green and sustainable finance and the transition to a low-carbon economy
5. explain the role of financial technology in supporting the growth of green and sustainable finance, and the steps that regulators, policymakers, institutions, organisations and Green and Sustainable Finance Professionals™ can take to support the mainstreaming of green and sustainable finance.

DELIVERY METHODOLOGY:

Green and Sustainable Finance has 12 units. The learning approach includes:

- reading and self-study
- learning activities
- case studies
- e-learning
- knowledge checks
- personal reflection and application of principles.

LEARNING RESOURCES:

Learning resources include:

- an online workbook – *Principles and Practice of Green and Sustainable Finance* - for core reading and learning activities
- interactive e-learning modules, including audio and visual resources, and online quizzes and knowledge checks to enhance understanding of key concepts.

ASSESSMENT

Green and Sustainable Finance is assessed by one online examination, lasting 1 hour, and consisting of 50 multiple choice questions.

Units 1 and 2: An Introduction to Green and Sustainable Finance, and Finance in Our Changing World
